INDEPENDENT AUDITOR'S REPORT

The Board of Directors
Banta-Carbona Irrigation District
Tracy, CA

March 15, 2015

Report on the Financial Statements

I have audited the accompanying financial statements of Banta-Carbona Irrigation District of the city of Tracy, California, as of and for the years ended December 31, 2014 and December 31, 2013, and the related notes to the financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the State Controller's minimum audit requirement for California's Special Districts. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, I express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Opinion

In my opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Banta-Carbona Irrigation District of the city of Tracy, California, as of December 31, 2014 and December 31, 2013, and the changes in financial position and cash flows thereof for the years then ended in accordance with accounting principles generally accepted in the United States of America as well as accounting systems prescribed by the State Controller's office and State Regulations Governing Special Districts

Other Matters

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 5 through 7 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. I have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquires of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge I obtained during our audit of the basic financial statements. I do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

My audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise Banta-Carbona Irrigation District's basic financial statements. The Supplemental Operating Statements and Cost of Service Rate Report are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Supplemental Operating Statements and Cost of Service Rate Report have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, I do not express an opinion or provide any assurance on them.

David McCoy, CPA
Modesto, CA

March 15, 2015

MANAGEMENT DISCUSSION AND ANALYSIS (UNAUDITED)

My discussion and analysis of the Banta-Carbona Irrigation District's (District) financial performance provides an overview of the District's financial activities for the fiscal year ended December 31, 2014.

Please read it in conjunction with the District's "Financial Statements and Independent Auditor's report, December 31, 2014 & December 31, 2013."

REPORTING THE DISTRICT AS A WHOLE

Statement of Revenues, Expenses, and Changes in Net Assets

One of the most important questions asked about the District's finance is "Is the District as a whole better off or worse off as a result of the year's activities?" The Statement of Revenues, Expenses, and Changes in Net Assets reports information about the District's as a whole and about its activities in a way that helps answer this question. This statement includes all assets and liabilities using the *accrual basis of accounting*, which is similar to the accounting used by most private-sector companies. Accrual of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

This statement reports the District's net assets and changes in them. You can think of the District's net assets, the difference between assets, what the landowners own, and liabilities, what the landowners owe, as one way to measure the District's financial health, or financial position. Over time, *increases or decreases* in the District's net assets are one indicator of whether its financial health is improving or deteriorating. You will need to consider other nonfinancial factors, however, such as changes in the District's county property tax allocation and the condition of the District's capital assets (roads, buildings, canals, pipelines and pump stations) to assess the overall health of the District.

In the statement of Revenues, Expenses, and changes in Net Fund Position, I have business type activities: the District charges a fee to help it cover all or most of all the cost of certain services it provides. The District's water distribution and pumping facilities are reported here.

DISTRICT FUNDS

Cash and Equivalents

Cash consists of general checking accounts and funds deposited in the Local Agency Investment Fund. The total of these funds is listed on the Statement of Net Fund Position under Current Assets, Cash and Equivalents. These funds are derived from water sales to customers within or outside of the District, interest and finance charges, and sale of assets no longer necessary for District business, standby charges levied, and any county tax allocation.

The District as a Whole

The District's total net fund position changed from a year ago, decreasing from \$26,796,623 to \$26,790,800 as can be seen on the Statement of Revenues, Expenses, and Changes in Net Fund Position, page 8 of the District's "Financial Statements and Independent Auditor's Report, December 31, 2014 & December 31, 2013".

Financial Ratios

"Working Capital" is the amount by which current assets exceed current liabilities. The current ratio, which compares current assets to current liabilities, is an indicator of the ability to pay current obligations. The current assets for 2014 are \$10,002,631 and the Current Liabilities are \$529,102 resulting in a Current Ratio of 18.9 for the year ending December 31, 2014, as compared to a current ratio of 17.3 for the previous year of 2013. The District still has an excellent ability to pay off its current liabilities with current assets being 18.9 dollars for every 1 dollar of current liabilities.

MANAGEMENT DISCUSSION AND ANALYSIS (UNAUDITED)

Business Type Activities

Operating revenues of the District's water sales increased by \$427,652 from 2013 to 2014. Supplemental Central Valley Project water sales were non-existent in 2014 as compared to 2013. The District held on to all surplus water during 2014 to carry-over into 2015. This plan of storing surplus water was implemented in April of 2014 in the event that if the winter of 2014-2015 was dry the district would have some stored water available in 2015. Non-operating revenues were similar to 2014 also.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

There are over \$2,500,000 in additions to District assets during 2014. The 1920's era 48 inch steel pipeline from Pumping Plant #6 to 6 East and 6 West Laterals was replaced with a new 72 inch pipeline. This pipeline project was a part of the Pumping Plant 5, 6 and 7 replacement project. The pipeline construction started in the fall of 2013 and was completed in March 2014.

The District continued long term planning efforts to identify ways to improve conveyance in the lift canal, to automate the water delivery system, and to replace old pumping plants with new ones.

The district continued to be aggressive at attempting to improve energy efficiency during 2014. During droughts, the District has access to less hydro-electric power to purchase and the District needs to rely more on pumping water from the river. Thus improving the pumping efficiency of the pumps in the lift stations provides more water for less energy. As a result pump repair expenses are high again in 2014.

The District has identified about 14,000 acre feet of conserved pre-1914 water rights water that has been generated by converting open dirt lined ditches into concrete pipelines and through water reuse. Of this 14,000 acre feet it has been determined that in-district uses take advantage of about 4,000 acre feet of the conserved water and that there is a little more than 10,000 acre feet available for transfer. This conserved water generates supplemental income that enables the district to keep water rates stable during dry years as well as fund capital improvements to the district's water distribution facilities.

As for the District's business-type activities, I expect that in 2015 electric power costs will be comparable but slightly up as compared to 2014's as power supply contracts are acquired in 2015 but hydropower generation projections will not be met. Thus additional power supplies will have to be purchased in 2015 to make up for the lower hydro power generation in 2015 due to the drought.

MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

As for the District's business-type activities, I expect that 2015 results may be down by as much as \$2,000,000 as pre-1914 water under supplemental water sales may not be available for transfer.

BANTA-CARBONA IRRIGATION DISTRICT
Notes to Financial Statements
For the Years Ended December 31, 2014 and December 31, 2013

NOTE A - SUMMARY OF ACCOUNTING POLICIES

A summary of significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

1. ORGANIZATION

Banta-Carbona Irrigation District was organized March 14, 1921, under California Irrigation District Law. The District now acts and operates under, and is governed by, the Statutory Authority known as the Water Code, State of California, Division 11, Irrigation Districts.

The District is located South of Tracy, California, in San Joaquin County, of which about 15,919 acres are assessable.

2. METHOD OF ACCOUNTING

The District's financial activities are accounted for using the principles of enterprise fund accounting. Enterprise Funds are used to account for operations that are financed and operated in a manner similar to private business enterprises where the costs (expenses, including, depreciation) of providing water to the water users in the District are financed through user charges. The District's financial statements have been prepared using the accrual basis of accounting.

The District uses the direct write-off method of recognizing bad debt losses. No allowance for uncollectible accounts has been provided. For the year under audit, no accounts are deemed uncollectible.

The district distinguishes operating revenues and expenses from non-operating items. Operating revenues result from providing goods and services in connection with ongoing operations; They usually come from exchange or exchange-like transactions. All other revenues are nonoperating. Operating expenses can be tied specifically to the production of the goods and services, such as materials and labor and direct overhead. Other expenses are nonoperating. Restricted resources are used to fund appropriations only after unrestricted resources are depleted.

CASH AND INVESTMENTS:

Cash consists of a general checking account and certificates of deposit. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates.

NET FUND POSITION:

Net fund position is the difference between assets and liabilities. Net investment in capital assets are capital assets, less accumulated depreciation and any outstanding debt related to the acquisition, construction or improvement of those assets. Net fund position is reported as restricted when there are legal limitations imposed on their use by legislation or external restriction by other governments, creditors or grantors.

BANTA-CARBONA IRRIGATION DISTRICT
Notes to Financial Statements
For the Years Ended December 31, 2014 and December 31, 2013

ACCOUNTS RECEIVABLE:

In some cases, the District provides water to its customers, without receiving full payment in advance from the user. The users owe the District for water used, but have not provided collateral nor provided full payment as of the balance sheet date. In the unlikely event that all customers failed to pay the District for the amounts owing, the total reorganized loss would be \$190,012. The District records Accounts Receivable at face value and recognizes interest on past due amounts when collected. Receivables are past due after 30 days of request for payment. The District has the authority to place liens on property that has past due water bills due to the District.

FINANCIAL REPORTING:

As permitted under GASB statement No. 20, paragraph 7. The District has selected consistently not to follow FASB pronouncements issued after November 30, 1989.

LONG-LIVED ASSETS:

Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the related carrying amount may not be recoverable. When required, impairment losses on assets to be held and used are recognized based on the excess of the asset's carrying amount over fair value of the asset and long lived assets to be disposed of are reported at the lower of carrying amount or fair value less cost to sell.

3. DEPRECIATION

The District provides for depreciation using the straight-line method over the estimated useful lives of the assets. Total depreciation expense for 2014 and 2013 was \$602,824 and \$597,413 respectively. The estimated useful lives by category are as follows:

General properties	20 - 100 Years
General Equipment	3 - 30 Years
PL 984 Project	59 - 100 Years
Fish Screen	100 Years
Buildings	50 Years

4. ESTIMATES:

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

5. INCOME TAXES

The District is a California Special District exempt from income taxes. Therefore, no provision for income taxes has been made in these financial statements.

BANTA-CARBONA IRRIGATION DISTRICT
Notes to Financial Statements
For the Years Ended December 31, 2014 and December 31, 2013

NOTE B - INVESTMENTS

Long-term investments are stated at fair value and consist of the following:

	2014	2013
LAIF	\$ 24,245	\$ 24,188
Manulife Financial Corp. Stock	121,030	125,088

The carrying amount of stock is determined by an independent pricing service contracted by the trustee holding the securities.

The following schedule summarizes the investment return in the statements of activities:

	2014	2013
Interest and dividend income	\$ 67,508	\$ 109,777
Net realized and unrealized gains (losses) on investments carried at fair value	(4,057)	35,060
Total	\$ 63,451	\$ 144,837

The following information classifies deposits and investments by categories of risk as defined by GASB Statement 3, "Deposits with Financial Institutions, Investments and Reverse Purchase Agreements."

Category 3 Uninsured and unregistered, with securities held by the counterparty or by its trust department or agent but not in the District's name.

The District has investments of \$24,245 in Local Agency Investment Fund (LAIF).

These investments are in structured notes and asset backed securities comprised of United States Treasury Bills, Federal Notes, CDs, Corporate Bonds, and Time Deposits. The Effective yield for the year ended 2014 was 0.56% and withdrawals require a day notice.

The District also owns 6,340 shares of Manulife Financial Corporation stock with a value of \$121,030 at December 31, 2014. The securities are held by Mellon Investors Services in the District's name.

The District's Investments as of December 31, 2014 are summarized below:

<u>Investment</u>	<u>Maturity Year</u>	<u>0-1 Years Before Maturity</u>	<u>1-5 Years Before Maturity</u>	<u>Credit Rating</u>
Central Valley Community Bank	2014	\$ 7,920,676	0	AAA
LAIF Investment Fund	2014	\$ 24,245	0	N/A
Manulife Financial	2014	\$ 121,030	0	AAA

NOTE D - ASSESSMENTS

The District received property taxes from taxpayers in San Joaquin County. The due dates of these taxes are November 1st and February 1st. These taxes become delinquent December 10th and April 10th. The Lien date for these taxes is January. The collection dates are December 10th, June 30th, and September 30th.

NOTE E - RETIREMENT PLAN

Effective July 31, 1974, the District adopted the Association of California Water Agencies Master Compensation Deferral Plan pursuant to Section 457 of the International Revenue Code. The total District payroll of the year was \$990,142 of which \$960,142 was covered by the pension plan. To be eligible to participate in the plan, an employee must have completed one year of service. An employee becomes fully vested immediately. The plan allows the participants to direct their investments in their accounts. The district matches each month up to \$100 of employee contributions. The District match is 130%. The District's policy is to fund pension cost accrued. Retirement plan expenses for the year ended December 31, 2014 and December 31, 2013 are \$22,640 and \$24,445 respectively.

BANTA-CARBONA IRRIGATION DISTRICT
Notes to Financial Statements
For the Years Ended December 31, 2014 and December 31, 2013

NOTE F - ECONOMIC DEPENDENCY

The District was organized to contract fees and administers delivery of water supplies to landowners within the geographical boundaries of the District. Therefore, the District's existence relies exclusively on the continuance of the need for water supplies by the landowners within the District.

NOTE G - FINANCIAL INSTRUMENTS AND CONCENTRATION OF CREDIT RISK

Financial instruments that potentially subject the district to concentrations of credit risk consist principally of cash, marketable securities, and notes and accounts receivable. The Company maintains, with a bank, cash deposits in excess of the \$250,000 FDIC insured amounts. Deposits in excess of \$250,000 in separate named accounts within one institution represent a credit risk to the company. As of December 31, 2014 and 2013, \$7,672,624 and \$4,822,235 respectively are in excess of the insurance coverage and are collateralized by securities are not held in the district's name. (Uncollateralized, Risk Category 3) Accounts receivable is due from landowners concentrated primarily within San Joaquin County.

NOTE H- RISK OF EXPOSURE

The entity is exposed to the risk of loss in various ways. The district is open to loss from injury due to the equipment and property the district owns and operates. The district is covered for loss from a general liability insurance coverage of \$20,000,000. The district is also covered by auto, workmen's compensation, and public official's insurance contracts.

NOTE I - SUPPLEMENTAL DISCLOSURES OF CASH FLOWS

Acquisition of property and equipment:

	<u>2014</u>	<u>2013</u>
Current year additions	\$ 240,665	\$ 1,540,325
Additions financed by Notes payable	<u>0</u>	<u>0</u>
Cash Paid For Property & Equipment	\$ <u>240,665</u>	\$ <u>1,540,325</u>

NOTE J - JOINT VENTURE

The District joined the PWRPA in attempt to secure a source of power in the future. During the year the district paid \$1,442,679 in fees to the PWRPA. The District may withdraw from the PWRPA at any time.

NOTE K - DATE OF MANAGEMENT EVALUATION

Management has evaluated subsequent events through April 25, 2015, the date on which the financial statements were available to be issued.

BANTA-CARBONA IRRIGATION DISTRICT
Notes to Financial Statements
For the Years Ended December 31, 2014 and December 31, 2013

NOTE L- POST-RETIREMENT HEALTH INSURANCE

Plan Description. In addition to the pension benefits described in Note F, the District provides post retirement health care insurance to all employees who retire from the district on or after attaining age 65 with at least 15 years of service. The District also provides post retirement health care insurance to all directors who retire with twelve years of service from the District who are age 50 or over. Currently, nine employees and four directors meet these eligibility requirements.

As of December 31, 2009 the District has adopted the provisions of GASB 43 and 45 for financial reporting of Post-employment Benefit Plans. This provision requires the district to periodically calculate the estimated Actuarial Accrued Liability (AAL). The district uses the alternative measurement method to calculate the post-retirement health insurance benefits. The assumptions used to calculate future inflation of healthcare costs and salary increases are that they will match the rate of inflation. Mortality rates provided by standard industry guides have been used to determine the expected length of benefits for participants. The plans expenses are paid as they come due and not prefunded. The accrued health care benefit liability at December 31, 2014 is \$2,907,225.

If a retiree, or his or her spouse, reaches 65 and becomes eligible for Medicare or otherwise becomes entitled to governmentally provided or mandated health insurance benefits, then the District may replace it's then existing approved health insurance coverage with supplemental health insurance of a type and amount to be determined by the District.

Funding Policy. The required contribution is based on projected pay-as-you-go financing requirements, with an additional amount to prefund benefits as determined annually by the legislature. Expenditures for post-retirement health care insurance are recognized as retirees report claims and as the calculation of the (AAL) changes.

Annual OPEB Cost and Net OPEB Obligation. The District's annual other postemployment benefit (OPEB) cost (expense) is calculated based on the *annual required contribution of the employer (ARC)*, and amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The following table shows the components of the state's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the District's net OPEB obligation (dollar amounts in thousands):

Annual required contribution	\$ 589,935
Interest on net OPEB obligation	61,628
Adjustment to annual required contribution	<u>(77,313)</u>
Annual OPEB cost (expense)	574,250
Contributions made	<u>(132,149)</u>
Increase in net OPEB obligation	442,101
Net OPEB obligation—beginning of the year	<u>2,465,124</u>
Net OPEB obligation—end of the year	<u>\$ 2,907,225</u>

BANTA-CARBONA IRRIGATION DISTRICT
Notes to Financial Statements
For the Years Ended December 31, 2014 and December 31, 2013

The District's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for 2014 and the two preceding years are as follows (dollar amounts in thousands):

<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Contributed</u>	<u>Net OPEB Obligation</u>
12/31/2012	\$100,379	100%	\$2,465,124
12/31/2013	557,624	24%	2,888,107
12/31/2014	574,250	23%	2,907,225

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far in the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial Methods and Assumptions. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan member to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

NOTE M- GASB 63

GASB 63 changes the title of the "Statement of Net Assets" to the "Statement of Net Position" and provides (1) that deferred outflows should be reported in a separate section following assets, and (2) deferred inflows should be reported in a separate section following liabilities. The statement then arrives at net position which includes the net effects of assets, deferred outflows of resources, liabilities, and deferred inflows of resources. In addition, the title of the "Statement of Revenues, Expenses and Changes in Net Assets" changes to the "Statement of Revenues, Expenses, and Changes in Net Position."

COST OF SERVICE RATE REPORT

Cost of Service Rate: "Cost of Service" refers to the total costs by the District in its operations, exclusive of the amounts paid for Central Valley Project water supply pursuant to the District's contract with the United States and Reclamation law, as reported in the District's Annual Financial Report. The Cost of Service Rate shall be the rate calculated by the District on an annual basis as follows:

$$\frac{\$ 4,682,794}{\text{(Prior Year Cost of Service)}} + \frac{\$4,549,398}{\text{(Current Year Cost of Service)}} / 2 = \$ 4,616,096$$

$$\frac{(46,115 \text{ ac ft}) + (54,625 \text{ ac ft})}{\text{(Total average acre-feet of water delivered by the District over the prior and current years)}} / 2 = 50,370 \text{ ft}$$

$$= \text{Cost of Service Rate} \quad \$4,616,096 / 50,370 = \$ \underline{91.64}$$

Total Acre Feet of Water Delivered:	2014	2013
Inside	38,267	46,750
Outside	1,202	1,252
Kasson	6,646	6,623
Total	46,115	54,625
